Cloud EHR, PM and Billing in One

MANDATORY DISCLOSURES FOR COST

Capability	Description of capability	Types of Costs or Fees to be paid by a provider for the capability	Additional types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of: > the capability.	> any data generated in the course of using the
170.315.a.1 Computerized Provider Order Entry (CPOE) Medication	This functionality enables users of CEHRT to place Medication orders electronically. (Multum Drug Database Version 276 and above)	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	The additional cost will be for Drug Database (Multum Cerner – Per Provider/Per Month), EPCS (e-Prescription for Controlled Drugs - Per Provider/Per Month)	None
170.315.a.2 Computerized Provider Order Entry (CPOE) Lab Order	This functionality enables users of CEHRT to place Lab Orders electronically.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	One time lab interface for provider paid by Lab	None
170.315.a.3 Computerized provider order entry (CPOE) – diagnostic imaging	This functionality enables users of CEHRT to place imaging orders electronically.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	One time imaging center interface paid by imaging center	None
170.315.a.4 Drug-to-Drug, Drug to Allergy interaction checks	This functionality enables CEHRT users to be alerted for potential drug interaction alerts before they commit the orders to the patient's chart. The e-Rx subscription to the CEHRT provider, access to Multum Drug Database Version 276 and above utilization review alerts during the process of ordering medications.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	The additional cost will be for Drug Database (Multum Cerner – Per Provider/Per Month), EPCS (e-Prescription for Controlled Drugs - Per Provider/Per Month)	None
170.315.a.5 Demographics	This functionality enables CEHRT users to capture demographic information of the patient. There is integration with PM system and PM system is the source for capturing demographic data as part of patient intake process.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.a.12 Family health history	This functionality enables the user to electronically record, change and access a patient's family health history.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.a.14 Implantable Device List	This functionality enables capture of patient implantable device data as history in the chart. The certified EHR interacts with FDA Webaccess GUDID to incorporate the device ID and Unique device identifiers for the implantable device.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.a.15 Social, Psychological, and, behavioral data	This functionality enables capture of social, psychological and behavioral data in a question and answer format in patient chart.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.b.1 Transitions of care	This functionality enables a user to electronically create and transmit a transition of care/referral summary in C-CDA format, which includes encounter diagnoses, immunizations, cognitive status, functional status, the reason for referral, and referring or transitioning the provider's name and office contact information. The solution follows C-CDA and Direct standards.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	The additional cost will be for One Time Setup Cost for Direct Message, Direct Message (Per Provider/Per Month) Additional cost for HIE integration and other registries	None
170.315(b)(2) Clinical Information Reconciliation and incorporation	This functionality enables a user to electronically reconcile problems, medication allergies, medications, and immunizations listed in an incoming transition of care/referral summary C-CDA format to against the patient's medication list, problem list, medication-allergy list, and immunization list in the EHR.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	The additional cost will be for Drug Database (Multum Cerner – Per Provider/Per Month), AMA (CPT and ICD Annual Royalty fees - Per provider/per year) The additional cost will be for One Time Setup Cost for Direct Message, Direct Message (Per Provider/Per Month) Additional cost for HIE integration and other registries	None
170.315.b.3 ePrescribing	Complete with drug-drug interaction checks, allergy checking and plan-specific formularies, this functionality enables a user to prescribe and route prescriptions directly from the exam room to the patient's preferred pharmacy for factor fulfillment. The solution uses RxNorm and NCPD standards, and the SureScripts infrastructure for prescription transmission to the pharmacy.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	The additional cost will be for Drug Database (Multum Cerner – Per Provider/Per Month), EPCS (e-Prescription for Controlled Drugs - Per Provider/Per Month)	None
§170.315(b)(9) Care plan	This is the functionality enables a user to create care plan electronically and export it in C-CDA format.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315(b)(10) Electronic Health Information export	This functionality enables a user to electronically create an export file(s) with all of a single patient's electronic health information in USCDI format that represents the most current clinical information about each patient. It includes clinical data defined in the USCDI , the reason for referral, and the referring or transitioning provider's name and office contact information.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	The additional cost will be for One Time Setup Cost for Direct Message, Direct Message (Per Provider/Per Month)	None
170.315.c.1 Clinical quality measures (CQMs) — record and export	This functionality enables a user to electronically capture and export all the data necessary to calculate each of the OmniMD's-supported Clinical Quality Measures (CQM), including the codification of CQM exceptions and exclusion.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost may apply for Submission of Data by OmniMD	None
170.315.c.2 Clinical quality measures (CQMs) — import and calculate	This functionality enables a user to electronically import all the captured data needed to calculate each of the OmniMD-supported Clinical Quality Measures (CQM), and to calculate each certified CQM using the Quality Reporting Document Architecture standard.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost may apply for Submission of Data by OmniMD	None
170.315.c.3 Clinical quality measures (CQMs) — import	This functionality enables a user to electronically create a data file for transmission of Clinical Quality Measures (CQM) data according to the Quality Reporting Document Architecture standard.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost may apply for Submission of Data by OmniMD	None
170.315 (d)(1) Authentication, Access Control, Authorization	This functionality enables certifying EHR to provide access the the electronic health information to a permitted user based on unique identifier(s) (e.g., username or number) to the end users.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(2) Auditable Events and Tamper-Resistance	This functionality enables certifying EHR to record auctions related to electronic health information , record audit log status, Record encryption status in accordance with standards specified respectively.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(3) Audit Report(s)	This functionality enables certifying EHR to enable a user to create an audit report for a specific time period and to sort entries in the audit log according to each of the data specified in the standards	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(4) Amendments	This functionality enables certifying EHR to enable a user to select the record affected by a patient's request for amendment and perform the capabilities.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(5) Automatic Access Time-out	This functionality enables certifying EHR to Automatically stop user access to health information after a predetermined period of inactivity and requires user authentication in order to resume or regain the access that was stopped.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(6) Emergency Access	This functionality enables certifying EHR to Permit an identified set of users to access electronic health information during an emergency	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(7) End-User Device Encryption	This functionality enables certifying EHR Technology that is designed to locally store electronic health information on end-user devices must encrypt the electronic health information stored on such devices after use of the	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(8) Integrity	This functionality enables certifying EHR to support the HIPPAA security rule implementation	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(9) Trusted Connection	This functionality enables certifying EHR to provide a level of trusted connection 1) encrypted and integrity message protection or 2) a trusted connection for transport to the end users.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(11) Accounting of Disclosures	This functionality enables certifying EHR to Record disclosures made for treatment, payment, and health care operations in accordance with the standard specified	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(12) Encrypt Authentication Credentials	This functionality enables certifying EHR to encrypt stored authentication credentials in accordance with standards.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (d)(13) Multi-Factor Authentication	This functionality enables certifying EHR to provide Multi-factor authentication through multiple elements, of the user's identity with the use of industry-recognized standards to end users.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.e.1 View, Download and Transmit to Third Party	This functionality enables patients to view, download or transmit their health information in the patient portal that was sent from OmniMD EHR. The data encompasses the USCDI.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.e.3 Patient Health Information Capture	This functionality enables user to capture patient health information into chart to support better patient engagement in their care.Patient portal can be utilized to provide this data in addition to EHR functions.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.f.1 Transmission to Immunization Registries	This functionality electronically transmits the recorded or changed immunization information to a state registry using HL7 Immunization Messaging standard.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost for HIE integration and other registries	None
170.315.f.2 Transmission to public health agencies — syndromic surveillance	This functionality enables the EHR to electronically create syndrome-based public health surveillance information for electronic transmission in accordance to the HL7PHIN Messaging standard for Syndromic Surveillance.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost for HIE integration and other registries	None
170.315.f.4 Transmission to cancer registries	This functionality enables EHR to create a cancer CDA document and submit to Cancer registries.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost for HIE integration and other registries	None
170.315 (f)(5) Transmission to Public Health Agencies - Electronic Case Reporting	This functionality enable EHR to Consume and maintain a table of trigger codes to determine which encounters may be reportable and transmit to public health agencies.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315.f.7 Transmission to Public Health agencies -Healthcare surveys	This functionality enables EHR to create a Healthcare ambulatory survey 1.0 CDA CDA document and submit to CDC.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost for HIE integration and other registries	None
170.315(g)(2) Automated measure calculation.	This functionality enables certifying EHR to record and calculate objective measures.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	Additional cost may apply for Submission of Data	None
170.315(g)(3) Safety Enhanced Design	This functionality enables certifying EHR to meet the summative usability guidelines for end users.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315(g)(4) Quality Management System	This functionality enables certifying EHR to the use of a Quality Management System (QMS) in the development, testing, implementation, and maintenance.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315 (g)(5) Accessibility-Centered Design	This functionality enables use of certified EHR technology for users with disability. Professional EHR adhered to WCAG 2.0 standards.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315(g)(6) Consolidated CDA performance	This functionality certifies the CDA performance for all CDA documents generated from certified EHR to ONC prescribed standards.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	The additional cost will be for One Time Setup Cost for Direct Message, Direct Message (Per Provider/Per Month) Additional cost for HIE integration and other registries	None
170.315(g)(7) Application access – Patient selection	This functionality enables patient to connect with Open APIs of OmniMD.	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315(g)(9) Application access – all data request	This functionality enables patient to connect with open APIs with OmniMD EHR and request data from USCDI	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs	HAPI Server	None
§170.315(g)(10) Standardized API for patient and population services	This functionality enables patient to connect with open APIs with OmniMD EHR and request data from USCDI	Monthly Subscription Fees /Per Provider. It includes all updates, upgrades and technical support. It also included Patient Portal at no additional costs		None
170.315(h)(1) Direct Project	This functionality allows certified EHR to connect with any HIE and demonstrate interoperability using DIRECT protocols. We have Direct Project integration with Updox.		The additional cost will be for One Time Setup Cost for Direct Message, Direct Message (Per Provider/Per Month)	None
